MADE IN BRITAIN
MADE IN BRITAIN

BUILT TO PERFORM

Innovative British engineering. Proven performance. Trusted by professionals.

At Hooftrimming Ltd., we understand that effective hooftrimming starts with the right equipment. That's why we are committed to designing and manufacturing high-quality hooftrimming crushes that deliver exceptional performance, reliability and ease of use, without compromising on animal welfare or operator safety.

Proudly designed, engineered and manufactured entirely in-house at our premises in Cheshire, UK, our range of HTL hooftrimming crushes combine robust construction, innovative technology and practical, user-focused design. Every machine is built with a clear purpose: to make hooftrimming safer, easier and more efficient for both the operator and the animal.

From our economical Static Manual through to the technologically advanced, flagship HTL Pro Plus, we offer a comprehensive range of machines to suit different requirements, working environments and budgets. Whether you're looking for a dependable solution for routine hoof care or a high-performance machine for a busy professional trimming operation, there's an HTL crush designed to meet your needs.

ENGINEERED TO LAST

But it's not just the quality of our machines that sets us apart — it's the service and support behind them.

We understand that reliability is paramount and that downtime can be costly. That's why our commitment to our customers extends far beyond the initial purchase. We maintain a comprehensive stock of spare parts, readily available when needed, and our experienced in-house engineers are always on hand to provide expert technical advice and support. Many issues can be diagnosed and resolved over the phone, helping to minimise disruption and keep your operation running smoothly.

We take enormous pride not only in the machines we manufacture but also in the lasting relationships we build with our customers. Our personal approach, extensive industry knowledge and commitment to dependable aftersales care mean you can invest in a HTL crush with complete confidence, knowing that the people who designed and built your machine are there to support you for years to come.

HTL Hooftrimming Crushes — British built. Professionally trusted. Backed by people who care.

Alex Burrows - Chairman of the NACFT

★★★★★

From the moment I spoke to HTL about looking to order a new Pro Plus, the customer service has been second to none. This certainly hasn't changed since I picked up my Pro Plus, with any questions or queries being dealt with straight away.
The craftsmanship that's gone into developing and building the Pro Plus is exactly the same as the customer service you receive - superb!

The Pro Plus is a pleasure to trim, and I'm sure the cows feel the same about being trimmed in it! I thought cows flowed well through my old machine, but the cow flow on the Pro Plus is another step up.

The HTL Pro Plus is a big investment, but one I'd absolutely recommend to any trimmer.

Joe Donnelly -JD Hoofcare, Shrewsbury

★★★★★

I have used HTL crushes for around 7 years now, starting with the HTL Pro and more recently the HTL Pro Plus. In my opinion the guys at HTL are on the top of their game when it comes to producing high quality and reliable hoof trimming crushes.

The Pro Plus has enabled me to maintain a high number of cows trimmed with improved cow flow and less physical stress on myself and the cow.

It is refreshing to deal with a British business that produces the best kit and backs it up with brilliant customer service.

Pierre Gacon - France

★★★★★

I am a hoof trimmer from France, and I hesitated for a long time before ordering my first HTL Pro, mainly because there is no dealer in France. However, there was no hesitation when I ordered my second crush – a HTL Pro Plus.

HTL are simply the best on all levels, including fantastic after-sales service!

They really have changed my life as a hoof trimmer! Thank you.

HTL Static Manual Hooftrimming Crush

The HTL Static Manual Hooftrimming Crush offers an economical, practical and safe solution for everyday hooftrimming without compromising on quality or functionality.

Built around a robust, fully galvanised steel frame, it features an adjustable, self-locking head gate to accommodate cattle of all sizes. Height-adjustable front leg blocks with secure tie-downs provide effective positioning, whilst a rump chain safely restrains the hindquarters and also allows the crush to be used for AI and veterinary examinations. A wide rubber bellyband, operated by a braked winch, provides comfortable support, whilst a separate braked winch offers controlled rear leg lifting.

Strong, simple and versatile, the HTL Static Manual Crush is a dependable, cost-effective choice for everyday hoof care.

FEATURES & BENEFITS

- Strong, ergonomically designed, galvanised steel frame construction
- Adjustable self-locking head gate
- Adjustable height wooden front leg blocks with tie down system
- Galvanised steel tread-plate flooring
- Wide rubber bellyband
- Braked winches on rear leg lift and bellyband

Optional Extras

Non-Slip Rubber Flooring
Durable, bubble-top rubber matting provides enhanced grip and stability underfoot, improving cattle comfort whilst also reducing noise.

Spring-Assisted Rear Rump Bar
Incorporating internal springs, this bar provides a secure yet cushioned hold on the hind legs, minimising sudden movement and improving safety when trimming with knives or grinders.

Electric Rear Leg Hoist
A proven, heavy-duty electric winch takes the strain out of lifting hind legs, reducing physical effort and operator fatigue. Supplied complete with remote control handset, rope and leg strap.

Two-Section Galvanised Steel Rear Gates
Robust, hinged, two-section rear gates help guide cattle smoothly and safely into the crush, improving ease of handling.

Front Leg Assembly with Hand-Wind Ratchets
Ergonomically angled front leg blocks, complete with hand-wind ratchets, allow front feet to be lifted, positioned and securely restrained, minimising movement during trimming.

Side-Opening Panels
Convenient side-opening panels provide unrestricted access to the animal, making veterinary examinations, routine procedures, clipping and mothering easier and more practical.

W-Bar
A specially designed W-shaped bar attaches to the back bar, helping to restrict hind leg movement and reduce kickback for greater operator safety when trimming with a grinder.

TECHNICAL SPECIFICATION

Maximum External Dimensions (With No Optional Extras)

- 2.1 metres long
- 1.2 metres wide
- 2.1 metres high

1.7 metres internal height / 720mm internal width
Weight = Approx. 350kgs

HTL Static Electric Hooftrimming Crush

The market-leading HTL Static Electric Hooftrimming Crush combines exceptional animal comfort, operator safety and ease of use in a robust, reliable hooftrimming solution. Featuring lead-in rear gates, an adjustable self-locking front head gate and five electrically operated hoists for leg and bellyband lifting, this crush delivers safe, controlled handling with excellent efficiency. A spring-assisted rear rump bar provides secure, comfortable restraint, whilst an additional rump chain and side-opening panels offer greater versatility and access.

The wide rubber bellyband supports the cow comfortably, whilst large-diameter head gate tubing and a fully opening front exit enhance animal comfort and encourage smooth movement through the crush. Tried and tested over many years, the five electric hoists provide dependable, controlled lifting for everyday on-farm use.

Combining proven technology, robust construction and thoughtful design, the HTL Static Electric Crush delivers outstanding comfort, control and efficiency.

FEATURES & BENEFITS

- Strong, ergonomically designed, galvanised steel frame construction
- Adjustable self-locking front head gate
- Wide rubber bellyband with electric hoist system
- Electric rear leg lift
- Rear rump chain
- 2 x IP56 single 3-pin electrical outputs
- Galvanised steel tread-plate flooring
- Electric front leg lifts with wooden leg support blocks
- Side plates
- Spring assisted rear rump bar
- Pair of two-section, galvanised steel rear gates
- Side opening panels

Optional Extras

Grinder Holder / Swing-Over Arm
A practical swing-over arm allows the operator to safely store and reposition their grinder around the crush, eliminating the need for extension cables or trailing wires.

Work Lights
Strategically positioned LED work lights above each foot improve visibility and enhance operator safety during trimming.

Non-Slip Rubber Flooring
Durable, bubble-top rubber matting provides enhanced grip and stability underfoot, improving cattle comfort whilst also reducing noise.

W-Bar
A specially designed W-shaped bar attaches to the rear bar, helping to restrict hind leg movement and reduce kickback for greater operator safety when trimming with a grinder.

Stabiliser Boards
Robust, bolt-on stabiliser boards provide additional width at the rear of the crush, preventing cattle from stepping outside the frame and reducing the risk of losing their balance.

Hydraulic Back Bar
An independent hydraulic system allows the back bar to be raised for cattle entry and lowered to securely position the animal. Operated via a convenient magnetic handset that can be positioned on either side of the crush or attached to the gates.

Hydraulic Texas-Style Head Gate
An independently powered hydraulic head gate allows effortless opening and closing at the touch of a button, improving cattle flow, reducing handling time and increasing efficiency.

Radio Control
Long-range wireless radio control allows the operator to conveniently operate both the hydraulic head gate and back bar from a safe distance, improving efficiency and operator safety.

TECHNICAL SPECIFICATION

Maximum External Dimensions (with no Optional Extras)

- 2.1 metres long- not including rear gates
- 1.4 metres wide
- 2.1 metres high

1.7 metres internal height / 720mm internal width
Weight = Approx. 500kgs
220/240v

HTL Hybrid Hooftrimming Crush

The HTL Hybrid Hooftrimming Crush combines the best of hydraulic and electric technology, delivering exceptional animal comfort, operator safety and efficiency.

Featuring a hydraulically operated Texas-style front head gate, hydraulic rear rump bar and five electric hoists, the HTL Hybrid provides precise, controlled handling with minimal operator effort. HTL's market-leading hydraulic lift system raises the entire crush to a comfortable working height, reducing physical strain. Integrated check valves and flow dividers ensure a stable, smooth and even lift.

The hydraulic front head gate offers precise, adjustable control for cattle of all sizes, whilst large-diameter tubing and a fully opening front exit enhance comfort and ease of movement. A wide rubber bellyband provides secure support, whilst the oversized, spring-assisted hydraulic rump bar ensures comfortable, controlled restraint of the hindquarters.

Combining advanced hydraulics with proven electric technology, the HTL Hybrid Crush takes hooftrimming comfort, throughput and efficiency to another level.

FEATURES & BENEFITS

- 300mm hydraulic lift
- Strong, ergonomically designed, galvanised steel frame construction
- Texas style hydraulic head gate
- Electric rear leg lift
- Hydraulic back bar
- Side plates
- Rubber flooring at the front and flow-forge rear
- Electric front leg lifts with wooden leg support blocks
- Rear leg deflectors
- Gate latches
- 2 x IP56 single 3-pin electrical outputs
- Wide rubber bellyband with electric hoist system

Optional Extras

Work Lights
Strategically positioned LED work lights above each foot improve visibility and enhance operator safety during trimming.

Grinder Holder / Swing-Over Arm
A practical swing-over arm allows the operator to safely store and reposition their grinder around the crush, eliminating the need for extension cables or trailing wires.

W-Bar
A specially designed W-shaped bar attaches to the rear bar, helping to restrict hind leg movement and reduce kickback for greater operator safety when trimming with a grinder.

Radio Control
Long-range wireless radio control allows the operator to conveniently operate the hydraulic head gate, rear bar and lift from a safe distance, improving efficiency and operator safety.

*Knife holders and grinder attachments available upon request

TECHNICAL SPECIFICATION

Maximum External Dimensions

- 1.9 metres long
- 1.6 metres wide
- 2.3 metres high (2.6 metres when lifted)

1.7 metres internal height / 725mm internal width
Weight = Approx. 750kgs
220/240v

HTL Pro Hooftrimming Crush

Evolving from the revolutionary original HTL design, the HTL Pro Hooftrimming Crush combines innovative technology, exceptional performance and a compact, practical design to meet the demands of professional hooftrimmers.

Engineered for animal comfort, operator safety and maximum productivity, the HTL Pro handles cattle of all sizes with ease, delivering excellent throughput even in the busiest operations.

Its low-profile, virtually ground-level entry encourages natural loading and improved cattle flow. An 8-function radio remote control comes as standard, allowing safe, flexible operation from a distance. Optional automatic sequencing further enhances efficiency, positioning and supporting the animal ready for trimming within seconds. Hydraulic front leg clamps provide smooth, controlled positioning at the optimum working angle, whilst hydraulic bellyband arms offer secure, comfortable support.

For added versatility, the bespoke, UK IVA-certified HTL transport trailer enables quick and easy transportation, whilst integrated, removeable wheels allow effortless manoeuvrability around the yard.

Compact, powerful and exceptionally versatile, the HTL Pro delivers the performance and reliability demanded by professional hooftrimmers.

FEATURES & BENEFITS

- Strong, ergonomically designed, galvanised steel frame construction
- Angled, hydraulic Texas head gate with large tubing
- Hydraulic front leg clamps
- Wide rubber bellyband on lift arms
- Kick plates
- Back bar with W-bar
- Lift system with check valves and flow dividers for an even and reliable lift
- 8-function radio control
- 24V LED work lights

Optional Extras

- Sequencing
- Heater box for Blockitt Pro 200 and STD & XL Blocks
- Storage cabinet
- MP3 Radio with speaker and aerial
- Pair of two hinged nod-gates with walk-through sections
- Hoof stabiliser bar for front leg clamps
- Loading wheels and a steering dolly
- Bespoke HTL Pro U-shaped trailer with UK IVA
- Gate racks on trailer
- Bandage/knife/spray can holders

TECHNICAL SPECIFICATION

Maximum External Dimensions

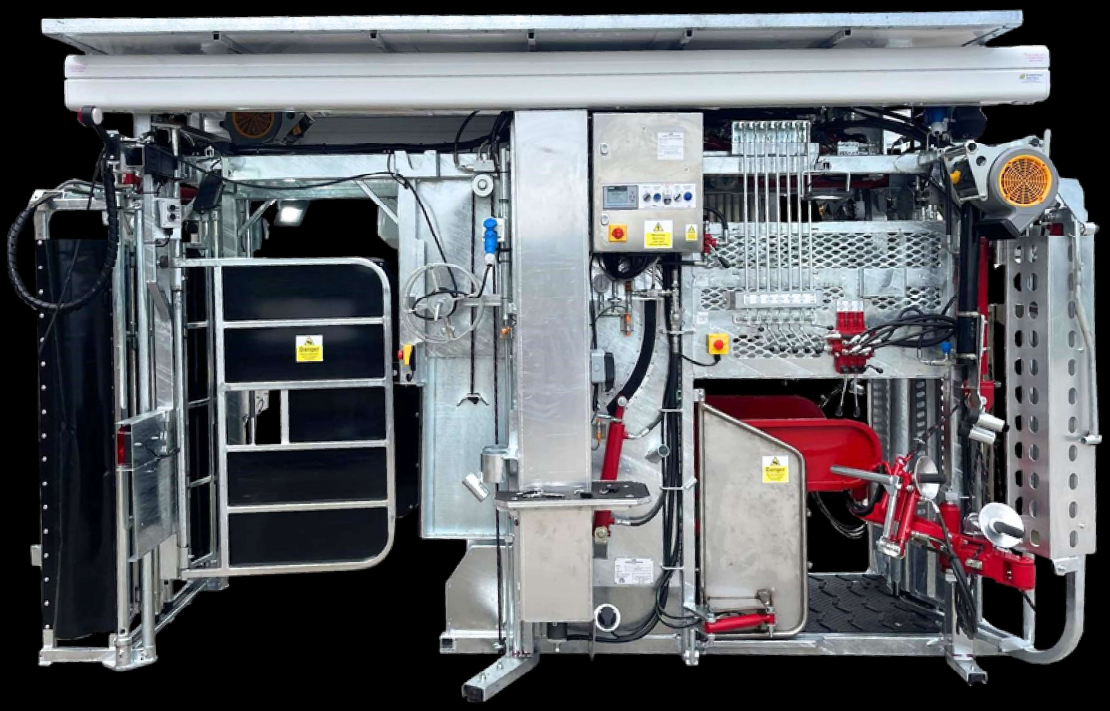

- 2.4 meters long
- 1.9 meters wide
- 2 meters high (2.6 meters when lifted)

1.7 metres internal height / 810mm internal width

Weight = Approx. 1500kgs (without trailer or any optional extras)

HTL Pro Plus Hooftrimming Crush

The flagship HTL Pro Plus Hooftrimming Crush represents the pinnacle of our range, combining cutting-edge technology, innovative design and exceptional engineering to deliver the ultimate professional hooftrimming solution.

Building on the proven HTL Pro, the HTL Pro Plus incorporates an innovative shuttle back door, designed to maximise cattle flow and increase productivity. The extended frame provides an ideal race entry point, encouraging smooth, natural loading and seamless handling of large batches of cattle.

A 10-function radio remote control comes as standard, allowing safe, flexible operation, whilst optional automatic sequencing activates multiple hydraulic functions at the touch of a button. Hydraulic bellyband lifting arms and the shuttle back door work together to provide secure, comfortable restraint for all size cattle.

Combining exceptional cattle flow, advanced technology and effortless operation, the HTL Pro Plus sets the benchmark for professional hooftrimming equipment.

FEATURES & BENEFITS

- Strong, ergonomically designed, galvanised steel frame construction
- Angled Texas front head gate
- Wide rubber bellyband on lift arms
- Hydraulic front leg clamps
- Back door shuttle with sequence valves and twin leg lifts
- Kick-plates
- Extended rear frame complete with manual side gates and rear race frame
- Lift system with check valves and flow dividers for an even and reliable lift
- 24V LED work lights
- 10-function radio control

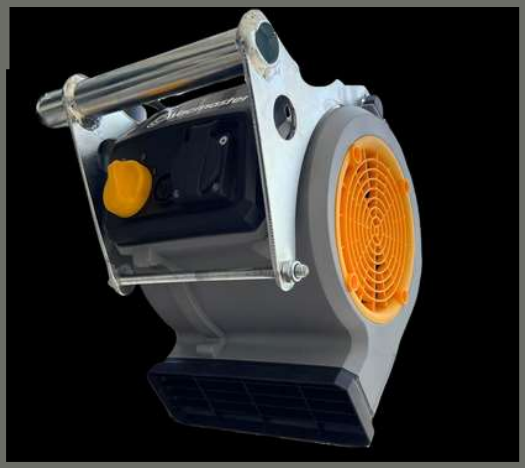

Optional Extras

- Sequencing
- MP3 radio with speaker and aerial
- Stabiliser bar for front leg clamps
- Loading wheels and a steering dolly
- Hydraulic adjusting rump chain
- Roof & heavy duty, wind out awnings for both sides
- Bespoke HTL Pro U-shaped trailer with UK IVA
- Large storage box with two roller shutters, insulated & thermostat controlled glue storage, block storage, general storage and paper towel dispenser
- Hydraulic rear sorting bi-fold doors
- Hydraulic side gates with additional sequencing

TECHNICAL SPECIFICATION

Maximum External Dimensions

- 4 meters long
- 1.9 meters wide
- 2.2 meters high (3 meters when lifted, with roof)

1.65 metres internal height / 765mm internal width

Weight = Approx. 1800kgs (without trailer or any optional extras)

SERVICING, REPAIRS & AFTER-SALES SUPPORT

Keeping you working. Keeping downtime to a minimum.

Our commitment to our customers doesn't end when their new HTL crush leaves our workshop. We pride ourselves on providing exceptional after-sales support, backed by our experienced in-house engineers and a comprehensive stock of spare parts.

From routine servicing and maintenance to repairs and technical assistance, our knowledgeable team is always on hand to help keep your equipment performing at its best. Many issues can be diagnosed and resolved over the phone, minimising unnecessary downtime and keeping you working.

HOOFTRIMMING TOOLS & SUPPLIES

Professional products for professional results.

Alongside our market-leading range of hooftrimming crushes, we offer a comprehensive selection of hooftrimming tools, equipment and consumables to support the everyday needs of professional trimmers and farmers alike.

From essential trimming tools to everyday supplies, we understand the importance of quality, reliability and performance. That's why we aim to provide practical, dependable products that help you work safely, efficiently and with confidence.

HOOFWEAR COUNTRY CLOTHING

Inspired by agriculture. Designed for everyday life.

Born from our passion for farming and the agricultural industry, Hoofwear Country Clothing is our very own clothing and lifestyle brand, combining comfort, practicality and style.

From our popular quarter-zips and cosy fleece collections to shorts and t-shirts for adults and children, Hoofwear offers quality clothing designed to be worn and enjoyed both on and off the farm.

Whether you're working outdoors, heading to an agricultural show or simply enjoying country life, Hoofwear brings a little agricultural personality to your everyday wardrobe.
